2-WAY SOLUTIONS

BRANDING SERVICES

Transform your vision into reality with our expert product and package branding services. Whether you are branding for your team or seeking white/private labeling, our stunning designs will add significant value to your product.

2-WAY SOLUTIONS

YOUR BRANDING, YOUR WAY

Shipped immediately, no wait time on branded products and packaging.
Choose between silk screen, sticker, or laser branded products.

Silk Screen

Utilize silk screen printing to achieve high-quality, durable brand impressions directly applied to the product surface. Highly resistant to wear and tear, fading, and environmental factors.

Sticker

Boost brand visibility with durable, custom weather proof vinyl stickers applied individually to each product. Ideal for small businesses and budget-conscious customers.

Laser

Laser engraving creates a high-end, sophisticated appearance that elevates your product.

Let's Kick It Up A Notch

Transform your company into a selling machine! Get custom digital selling tools for your specific products you buy from National 2-Way. Check out our digital catalogs below, for great ideas to help you sell more. Don't hesitate to reach out and ask for custom selling tools just like these.

2-WAY SOLUTIONS

Jennifer D.
Store Owner

"As a supervisor in a fast-paced manufacturing facility, communication is crucial. The Snaplock Earpiece System has been a game-changer for our team. The hygienic, snap-on earpieces eliminate the concern of cross-contamination between shifts, which is a huge plus."

Choose Your Perfect Setup

Experience the freedom to select the ideal earpiece for your team, knowing you're investing in a reliable and efficient system that enhances safety and productivity.

Mix and match from our wide range of earpieces to create your perfect team's setup, ensuring optimal comfort and performance for every user. Snaplock delivers the perfect blend of performance, flexibility, and value.

2-Wire Acoustic Tube Setup

The 2-Wire Snaplock system is the ideal choice for retail teams requiring enhanced flexibility and control. This setup, with its robust snap-lock connection for hygienic earpiece swaps, provides a durable and customizable solution, enabling clear, hands-free communication without compromising on user comfort or operational efficiency.

Earpiece

1-Wire Acoustic Tube Setup

This setup integrates the microphone and earpiece into a single unit, connected directly to the radio, minimizing cable clutter and maximizing ease of use. The Snaplock feature still allows for quick earpiece changes for hygiene, while the single-wire design ensures a discreet and comfortable experience for retail staff, facilitating clear communication and seamless customer service.

Extra Strength For Your Team

Upgrade your teams cable to braided fiber cable. Withstand the rigors of harsh environments, including extreme temperatures, moisture, and physical stress.

Unleashing the Power of Braided Fiber

In the world of two-way radio communication, durability is paramount. Traditional resin materials, while functional, can often fall short under the rigors of daily use. Enter braided fiber, a revolutionary technology that's redefining the standards of radio cable strength and longevity.

The Science Behind the Strength

Braided fiber cables are constructed by intertwining multiple strands of high-tensile fiber, creating a robust and flexible structure. This intricate weaving technique significantly enhances the cable's tensile strength, tripling its durability compared to standard resin materials.

A Future Proof Solution

By investing in two-way radios equipped with braided fiber cables, you're choosing a future-proof solution that can withstand the test of time. Experience the difference of unparalleled durability and reliability, ensuring seamless communication, even in the most demanding conditions.

INNER EAR PEACE

STARTS HERE

Micro Speaker Technology

HDIE's in-ear micro speaker technology for two-way communication offers several compelling advantages:

1 Comfortable Fit
Utilizing Micro Technology, this lightweight and compact design is meant for all day comfort like you have never experienced before. Seamlessly blending into your routine, you'll practically forget it's even there.

2 Clear Sound Quality
Despite their small size, Micro Speakers can produce high quality HD audio with clear sound reproduction, ensuring effective communication.

3 Situational
Achieve an ideal balance between immersing yourself in audio and staying aware of your surroundings.

4 Covert
This covert earpiece is intentionally designed to be small, sleek, and easily concealable. It fits snugly within the ear canal, remaining virtually invisible to casual observers.

5 Low Power Consumption
Micro speakers are energy-efficient, helping to conserve battery life in portable communication devices.

6 Durable Construction
Our Micro Speakers are built with durable materials, ensuring longevity and reliability even in challenging environments.

7 Wide Frequency Range
Micro speakers can cover a broad frequency spectrum, delivering a rich audio experience that captures both high and low frequencies.

8 Cost-Effectiveness
Due to advancements in manufacturing processes, micro speaker technology has become more affordable, making in-ear earpieces with this technology accessible to a wider range of consumers.

9 Enhanced Communication
Utilizing Micro Speaker Technology improves the overall communication experience by providing clear, reliable, and immersive sound.

Micro Speaker Breakdown

Balanced armature drivers are capable of reliably reproducing high-fidelity sound in an exceptionally small size because they incorporate a specially constructed reed that is highly magnetically permeable, specially annealed and placed precisely in the center between the magnets.

WITH 3 DIFFERENT COMFORT STYLES

CHOOSE YOUR INNER EAR PEACE

MICROHDIE

Adjust To Comfort

The MicroHDIE features a removable earhook cable guide that allows for a comfortable, custom fit. Its transparent design blends seamlessly with the earpiece for a discreet, professional look. It rests securely behind any ear size, providing a simple adjustment to position maximum comfort.

MICROSLIDE

Slide To Comfort

The MicroSlide features a non-removable, adjustable ear slide. You can easily slide the cable to set the perfect distance between the top of your ear and your ear canal. Designed to fit any ear size comfortably, this device rests securely behind your ear, offering a simple slide for a custom fit.

MICROBEND

Bend To Comfort

The MicroBend features a flexible pre-formed ear hook that you can bend to achieve a personalized and comfortable fit. Unlike traditional designs, this model gives you the flexibility to customize its shape for a truly secure fit.

Black

SERIES

You Are But
Dust And Shadow

Fade into the shadows and into your duty. The black series gives you the same high-quality earpieces with a dark design to seamlessly blend into your environment.

Leo
SERIES

Calm In The Eye Of The Storm

The lightweight and adaptable system features a high-quality microphone, durable braided fiber cloth cord, and wireless operation for increased flexibility. Engineered for demanding use, it offers reliable dust and water resistance.

IP67 Rated
Remote PTT Compatible

The Leo 1 PTT's IP67 rating is a significant feature, providing unmatched protection against complete dust ingress and temporary submersion in water up to 1 meter.

This exceptional durability is vital for professionals operating in the most extreme and unpredictable environments. Furthermore, its ability to connect to a remote PTT offers enhanced operational flexibility and convenience.

Leo 2 PTT

IP54 Rated
Remote PTT Compatible

The Leo 2 PTT's IP54 rating is a significant feature, protecting the device from dust and water splashes from any direction. This level of durability is crucial for professionals who rely on their gear in unpredictable, challenging environments.

Ultimately, the IP54 rating ensures the device remains functional and reliable, while its ability to connect to a remote PTT offers you flexible and convenient control.
